## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claim(s) 79-106 is/are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: Prior art does not teach or fairly suggest a method as detailed in independent claims 79 and 93, which include a combination of steps of providing a file, having no unique identifier prior to printing, with information to be printed on each of printed documents; each document is then provided with a recording medium with contactless transponder stored with unique identifier in unchangeable fashion; each document is then printed using high-speed printer from said file and automatically instituting a reprinting of the document associated with a new transponder when previously applied transponder is not successfully read; the unique identifiers read from the transponder in the file is then linked with the information printed in each document.
